- Model\*** - Model labeling code is unique per catalog/catalogue (not consistent with other catalogs/catalogues).
- Each model and area in the catalog/catalogue is represented by a label code.
- Serial Number** - Applies to Engine or Frame serial numbers depending on the section. The serial numbers of a unit (frame, engine, carburetor) should be checked prior to ordering parts for the unit. In cases where a part has been modified, the beginning and/or ending serial number of the unit bearing the modification is listed in the "SERIAL NUMBER" column. Modification parts can be controlled by three types of numbers as described below.  
**Engine serial number** - Engine group parts (Block numbers beginning with "E").  
**Carburetor identification number** - Carburetor component parts.  
**Frame serial number** - Frame group parts (Block numbers beginning with "F").

Note: For U.S. only - For your convenience the current supersede chain, as of print date, has been listed. Supersede chains are subject to change without notice.
- H/C** - The Honda Code and Part Number share a 1 to 1 relationship (U.S.A. only).
- The Block Number identifies the catalog/catalogue section.

### CONSTRUCTION OF PART NUMBERS

All parts are classified into two groups, "GENERAL PARTS" and "STANDARD PARTS". All parts are numbered according to the system described below:

#### General Parts

Example: Driver Seat Assembly Part No. 77400-634-671ZA  
 Function No. 77  
 Component No. 400  
 Model Code No. -634-  
 Modification Process Design 671  
 Color/colour Indicator\*\* ZA

#### Standard Parts

Example: 8 x 18 Hex. bolt Part No. 92000-08018-0A  
 Function No. 92000  
 Dimensions -08018-  
 ISO Standard Designation 0  
 Chemical Surface Treatment A

\*\*The color/colour indicator at the end of a part number signifies a color/colour. These color/colour indicators such as ZA, ZB, ZC . . . , except ZZ, do not identify the actual color/colour. Actual colors/colours are identified by a code that appears between asterisks in the part description.

**Additional information** - The section index located at the bottom of each microfiche grid lists section titles. The Engine and Frame sections have separate section indexes.

Some Block Titles are numbered, such as Air Cleaner (1), Air Cleaner (3), Muffler (2) or Muffler (4), etc. These may skip numbers when some blocks apply in other volumes of the same model(s).

\*When columns become full, additional data is displayed on a second line.

Note 1 - A modification that does not follow the pattern above will be clarified by a comment located below the part description.

A serial number chart and a guide to serial number locations are provided in the front portion of the catalog/catalogue.

- AREA\*** - Applicable area code is defined in the serial number chart.
- ORG\*** - Manufacturing country of origin of the unit.

# CONSTRUCTION OF VEHICLE IDENTIFICATION NUMBER

Any change or modification of parts is directly related to the V.D.S. and V.I.S.  
 A V.I.S. number will appear in the "Serial No." column of the Parts Catalog if a part is changed or modified.

**COMMENT:**

This example is generic and applies to 1981 and newer vehicles. 1980 models and prior are referred to as "FRAME NUMBERS" and the construction is designed by using the model designation or code followed by a sequential number.
